

# Case Study - John Lewis Oxford St Bathroom Revamp

ABISS was asked to complete the flagship Oxford Street store for John Lewis with the implementation of a full bathroom revamp with 90% of the store displays changing. The project included the full rip and consolidation of the sold ex-displays, including the removal, make good, plastering and decoration with either tiling and paint to all the displays. Due to the restricted space and the timescales involved, ABISS managed to program the revamp efficiently using multi-scaled resource to complete the store within 1 week to completion. This included all additional joinery and a full clean.
